INDUSTRY  
READY KIT

Upgrade to a dual action airbrush for only £80 more

Total £275.00

- 1 AC25 Compressor
- 1 SP35 **Dual Action** Airbrush

What's the difference between **single** or **dual action**?

### Single Action Airbrush

The trigger has one movement (action).

When pulled back it allows product to flow through the airbrush and spray a fixed amount of make-up.

Pictured: Dual Action Airbrush, image is for representation purposes only.

✓ Simplicity, easy to master

### Dual Action Airbrush

The trigger has two movements (actions).

When pressed down, it allows air to flow through the airbrush. When pulled back it allows makeup to pass into the airstream. The further it is pulled back, the greater the volume of make-up that is allowed to pass through.

✓ Greater control over the airflow
